Precision Engine

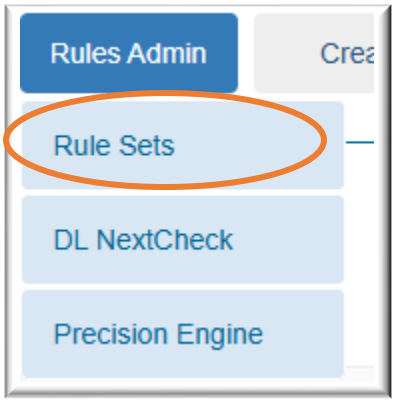

Overview

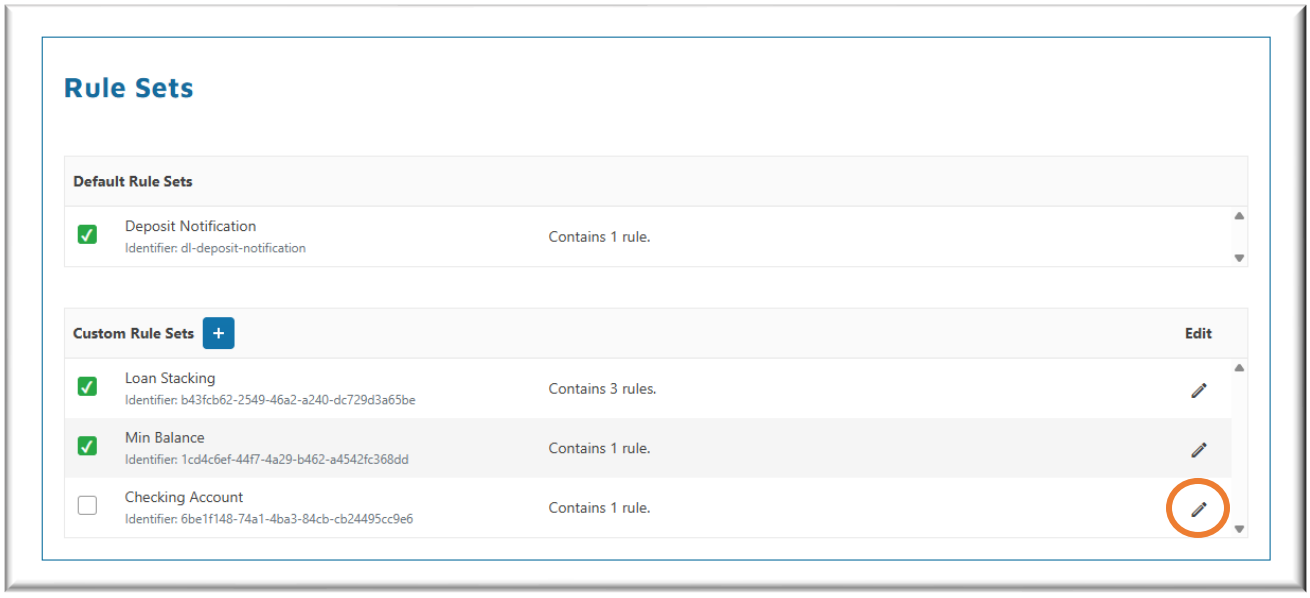

Precision Engine is a score builder that gives customers the ability to create their own weighted scores using DecisionLogic data points to make instant decisions based on key information specific to their business.

Portal

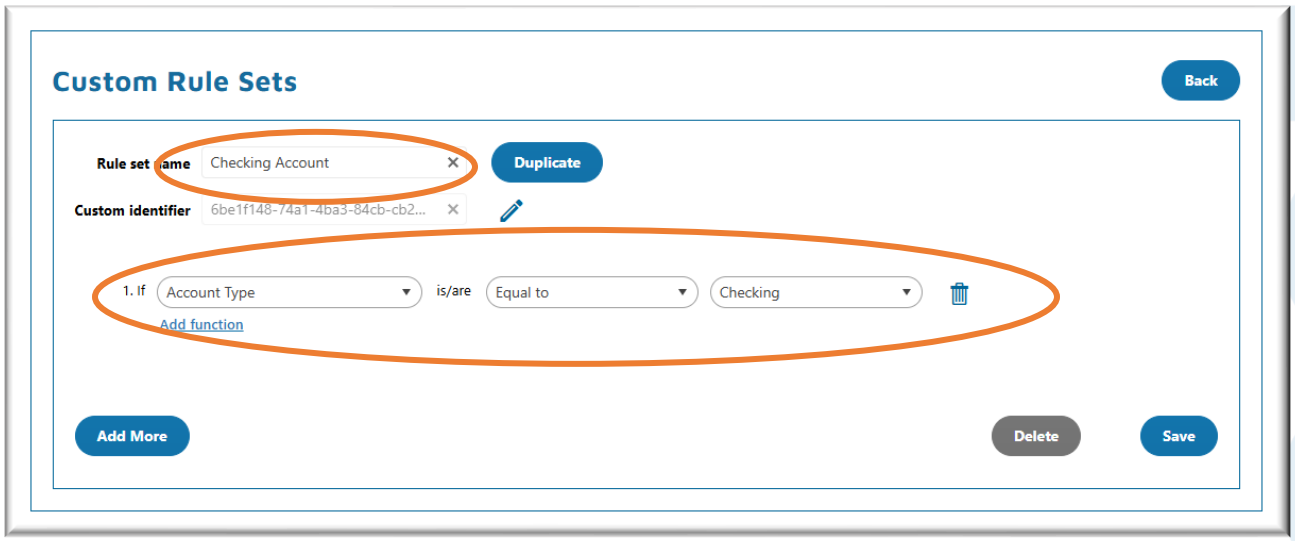

Rule Set Page

Build/edit one or multiple custom Rule Sets with data points relevant to your business. (Ask about DL NextCheck for additional information on Rule Sets).

10645 N Tatum Blvd.,
Suite 200-424 Phoenix AZ 85028

Optionally add special criteria for each Rule Set.

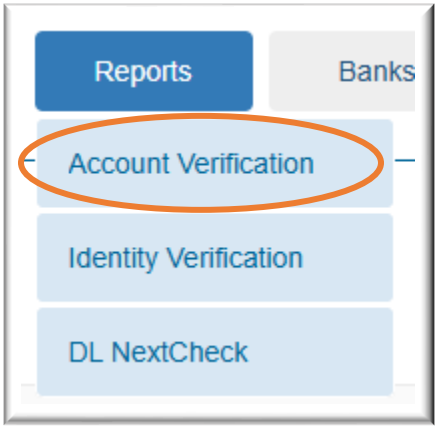

Set thresholds for “Fail”, “In Review”, or “Pass” relative to your business needs.

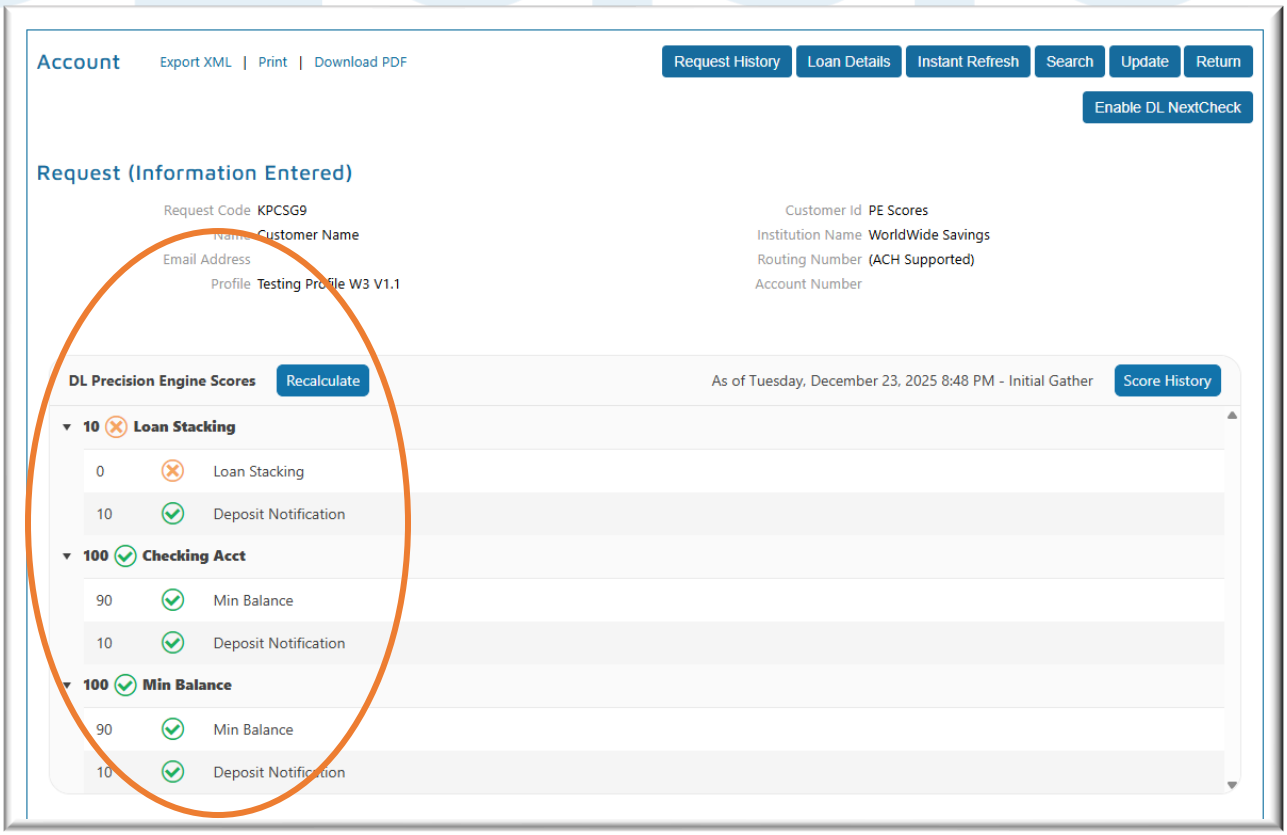

Report – Score History

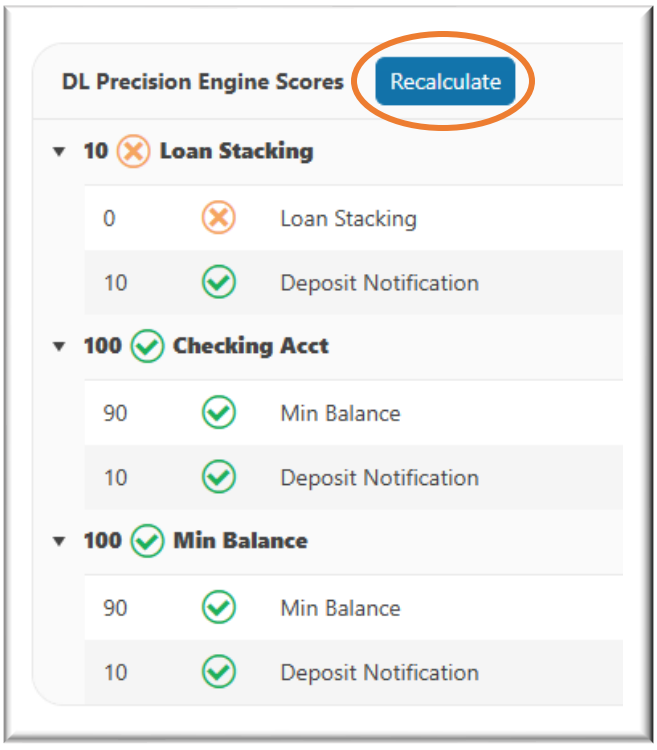

Precision Engine scores will appear on all DecisionLogic reports.
